Aloye Computer Enterprises

Mission

Aloye Computer Enterprises is relentless in its efforts to provide superior information technology services and unparalleled technical support to all of our corporate clientele. We believe that in the changing world of business, small and medium size companies can maximize their capabilities by utilizing the knowledge, experience, and "full service" technology resources of an experienced, local technology provider. Equipping your business to maximize the capabilities of high technology will increase your business's potential to offer products and services, as well as extend the scope and range of customers that can be reached.

Since its inception in 1998, Aloye Computer Enterprises mission has been to design, build, and support various types of technology and Computer infrastructures that are in use today. We believe that business is about efficiency. Cost, Efficiency, and capabilities are contributors to the success of an enterprise.

Aloye Computer Enterprises mission is to empower our clients with a strong technology foundation. We know your mission is to succeed. Our tools will help you to do it.

Aloye Computer Enterprises

Services for *Business*

Comprehensive Technology Solutions

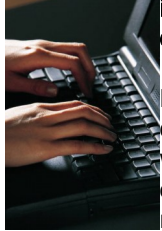

Information Technology

IT's our Business!

Secure Workstation Operability Solutions

Does your organization spend time or money correcting PC configuration problems brought about by daily users? Do you spend time restoring or troubleshooting systems because users occasionally install their own software or mistakenly delete critical system files?

Prevent your users from altering the configuration of company owned workstations and laptops. Reduce and eliminate the need to continually restore altered software configurations.

Stop worrying about users accidentally deleting or altering essential windows files. Stop computer workstation configuration nightmares before they start with Aloye Computer Enterprises Secure Workstation Operability Solutions (ACE-SWOS)

Desktop & Laptop System Replication Service

Do you have multiple computers that require the same software and system configuration? Do you find yourself running restore CD's, and installing applications manually when new employees or users enter your organization? Are system installations taking up precious time and technical resources?

If you answered yes to any of these questions, we urge you to inquire about our System Replication Service. Aloye Computer Enterprises System Replication Service (ACE-SRS) is designed to quickly and efficiently replicate the same system software, configuration, data and more over multiple computers simultaneously. This eliminates wasted time and makes your organization more efficient and productive. Since all system replication is done at our technical operations center, you will not compromise your bandwidth or network resources.

Computer Network Setup & Configuration

Do you need an affordable and reliable computer network for sharing data, entering and storing information, accessing the World Wide Web and email? Are you looking for a comprehensive and affordable solution to meet the needs of your organization?

Aloye Computer Enterprises has the solution for your network needs. Aloye Computer Enterprises is a growing business that understands the needs of your small business. Computer networks can be costly and complex. Perhaps your organization has relinquished the idea of installing a computer network because of the cost and complexity involved. Do not give up. Emergency/Critical Data Backup Systems

Are you completely confident with your current backup methods and restoration procedures should an unforeseen disaster befall your system, network, or infrastructure? Does your organization have a comprehensive integrated backup and restoration system in place? Are you certain your organization's business, finance, customer, and operations related data will be complete and accurate with your current system and methods of backup?

If you answered no to any of these questions, then it is time to inquire about Aloye Computer Enterprises Advanced Backup Solutions (ACE-ABS). With ACE-ABS, you can finally rest assured with confidence that all your essential business, financial, customer, and operations related data will be complete, accurate and easily accessible. In addition to backing up your data, we can also perform a complete system analysis and work with you to develop procedures and methods to get your infrastructure back online should the need arise. We don't just back up your data; we give you the tools to restore your infrastructure.
